

**AMERICAN FALLS RESERVOIR DISTRICT NO. 2
(AFRD2)**

RFP No. 2025-1

ADDENDUM NO. 2

April 16, 2025

Issued by:

AFRD2

409 N. Apple St.

Shoshone, ID 83352

Addendum No. 2

PROFESSIONAL CONSULTING SERVICES TO EVALUATE THE AFRD2 MAIN CANALS FOR EFFICIENCY IMPROVEMENTS

Additional information requested since the March 31, 2025 meeting:

- 1.) How many possible head gates are in the system that are too high and need adjustment?**

We don't know for sure, but an estimation would be less than 20 throughout the system from Milner to Tuttle. It would possibly be less than ten in the reach between Milner and Dietrich.

- 2.) What gauge does AFRD2 currently use to identify the spills out of its system?**

USGS gauge "Malad River near Gooding 13152500"

- 3.) Is there any additional mapping available of the system?**

Two additional KMZ maps will be sent to firms who attended the March 31, 2025 meeting. The maps will also be posted to the BWCCAFRD2 website. The maps are titled "***laterals 28 MAR 2025***" and "***mains 28 MAR 28 2025***"

- 4.) Are there any limitations on the schedule that we need to be aware of?
Particularly for the funding?**

There are no limitations to the schedule other than those dates listed in the original RFQ. We have no schedule for funding at this time.

- 5.) Will there be any work in the Big Wood system as related to the "AFRD2 MAIN CANALS FOR EFFICIENCY IMPROVEMENTS"?**

There will be no work in the Big Wood system as related to the project discussed at the March 31, 2025 meeting. If any work is performed in the Big Wood system, that work will be a separate project in the future.
